mission statement has a lot to do with moving forward and improving over time to accommodate this change. Our values are team-focused, performance driven as well as customer focused, as we believe this is the culture within the organization needed to succeed and achieve our vision. This is the foundation we build our people on, whom we find is the biggest factor that gives us our sustainable competitive advantage today.

Q: Customers are increasingly expecting more than just good products and services, how important is sustainability in your operations?

A: We believe it is important and corporations need to be responsible, taking into account sustainable practices when making decisions. We are supportive of government initiatives such as banning plastic straws and using biodegradable plastic bags. We were recently selected by the Department of Environment Malaysia as the main sponsor and representative for the food and beverage industry for Malaysia due to our compliance and effort to maintain environmental standards and sustainable practices in manufacturing as well.

Q: With standards improving, how do you benchmark against the industry?

A: Generally, we look towards similar chain brands as a comparison as well as the overall growth. As our vision is to be the leader, we always benchmark to the best and measure our growth yearly to see how much we have progressed. We are also very proud to be able to represent Malaysia at an international level where we have opened Secret Recipe in over 10 countries to date.
